PROJECTS

Smart Irrigation System using IoT Approach

- The concept of this project is to allow the owners of fields to control and observe the growth of their plants in their farms.
- This project allows surveillance on their crops so as to not occur loss.
- It is easy to use for anyone with a Smartphone and doesn't require maintenance once set up.

OTHER PROJECTS

Blog Website

- This is a Website for hosting blogs at runtime
- Built with Vite, ReactJS, Tailwind CSS, and powered by Firebase as the backend.
- This project aims to revolutionize the blogging experience, offering a seamless blend of performance, aesthetics, and ease of use.
