OBJECTIVE

I am a Computer Engineer with a passion for app development.and I like to work in an environment which encourages me to succed and grow professionally where I can utilize my skills and knowledge appropriately

MY PROJECTS

Alumni Management Website (mini project)

- This is a project that helps a certain universitymanages its alumni data.
- This website built with Next js, and powered by Firebase as the backend.
- Source Code : https://github.com/Viswajith2003/Alumni_Website/

Smart Irrigation System using Iot Approach (Diploma Project)

- The concept of this project is to allow the owners of fields to control and observe the growth of their plants in their farms.
- This project allows surveillance on their crops so as to not occur lose.
- It is easy to use for anyone with a Smartphone and doesn't require maintenance once set up.

OTHER PROJECTS

Trend Cart - Shopping App (project)

- Trend Card is a dynamic and user-friendly Android application designed to streamline the online shopping experience.
- Technology Stack: Android studio (java), Firebase as Backend
- https://github.com/Jerald-Joyson/Trend_Cart_Mini_Project/

Blog Website (Group project)

- This is a Website for hosting blogs at realtime
- Built with Vite, ReactJS, Tailwind CSS, and powered by Firebase as the backend.
- Source Code : https://github.com/Jerald-Joyson/devscript-stackup/

Hostel Debt Book (Hobby project)

- This is an app for students who are staying at hostels.
- It allows for easy calculation of mess bills and includes a built-in calculator for simple calculations.
- There is also a notepad for writing important notes.
- Source code: https://github.com/Jerald-Joyson/Hostel-Debt-Book/
